

Hisham A. | Business Analyst

Cairo, Egypt

☎ +20 114 040 0740 • ✉ Hisham-666@outlook.com • in logician666

Professional Summary

Business Analyst with 5+ years of progressive experience spanning accounting, ERP administration, and systems delivery. Brings rare end-to-end fluency across finance, operations, and technology — enabling faster gap analysis, more credible stakeholder engagement, and implementations that stick. Proven across multi-territory deployments, enterprise migrations, and automation pipelines that have saved organisations over USD 120K in costs and 16+ man-hours weekly.

Skills

Business Analysis: Requirements Engineering, Process Mapping (As-Is / To-Be), Gap Analysis, BRD / FRD / SRS

Delivery & Quality: UAT Planning & Execution, Test Case Design, Go-live Readiness

Stakeholder Enablement: Cross-functional Facilitation, User Training, Change Management, SOP & User Guide Documentation

Data & Reporting: Power BI, Metabase, Excel, Google Sheets, Python (NumPy, Pandas, Matplotlib), Jupyter Notebooks

Automation & Integration: ETL pipeline design, Workflow automation, Python scripting, Data Migration

Enterprise Platforms: Oracle NetSuite, Odoo, ClickUp

Tooling: StrictDoc, Doorstop, Draw.io, Visio, GitHub, L^AT_EX, Markdown, NeoVim

Professional Experience

Flat6Labs (MENA's leading startup accelerator)

Remote

Business Analyst

2025 – Present

- Lead end-to-end requirements elicitation, documentation, and lifecycle management for cross-functional stakeholders across multiple business units.
- Conduct gap analysis to reconcile business needs with technical specifications, prioritizing scalable delivery decisions across enterprise applications.
- Configure and deploy business applications, validating system alignment with organizational workflows and data governance standards.
- Design and execute UAT programmes — authoring comprehensive test cases, coordinating sign-off, and resolving post-go-live issues with development teams.

★ **Key Achievements:**

- Saved the business over USD 120 K in annual licencing, subscription, and support costs through meticulous gap analysis for system migration, data backup and migration, internal implementation, and user training and change management.
- Engineered scalable support-management protocols enabling seamless multi-territory operational expansion.
- Designed workflows and data-pipeline automations that save ~ **16 man hours** per week.

Flat6Labs (MENA's leading startup accelerator)

Remote

ERP Administrator

2023 – 2024

- Administered enterprise system environments and governed role-based access control for a **30+ user** multi-regional base.
- Built Power BI reporting suite adopted by senior leadership for ongoing business intelligence.
- Delivered recurring technical training and first-line support, ensuring high system adoption across geographically distributed teams.

★ **Key Achievements:**

- Achieved a **25% reduction** in manual task redundancy through workflow automations, directly accelerating core finance processes.
- Established the systems and reporting foundations that led to a promoted Business Analyst role, overseeing the full delivery lifecycle.

Flat6Labs

Hybrid

Accountant

2022 – 2023

- Managed full-cycle Accounts Payable (AP) operations and maintained accurate financial records within Oracle NetSuite.
- Performed rigorous bank reconciliations, expense reporting, and vendor statement matching.

★ **Key Achievement:**

- Played a hands-on role in the Oracle NetSuite go-live — supporting data migration, system logistics, and post-launch stabilisation — directly earning the subsequent ERP Administrator position.

Progressive Business Services (IKEA KSA & Bahrain)

Hybrid

Junior Accountant

2021 – 2022

- Contributed to RPA initiatives for AP workflow automation, demonstrating early systems thinking beyond the accountant remit.
- Supported the Dynamics NAV → Dynamics 365 F&O migration project across two market territories (IKEA KSA & Bahrain).
- Designed Power BI dashboards to monitor AP KPIs (aging, cycle time, error rate), enabling data-driven performance improvements.
